OPTIONAL WALL MOUNT:

Move unit to desired location and mark spot through top shelf wire on each side of unit. Drill $\frac{3}{4}$ " holes at each marked spot, then insert plastic anchors(BB) into holes. Insert screws (CC) through the washers (AA) then through the back of the top shelf wire and into the plastic anchors(BB)

IMPORTANT SAFETY INFORMATION

Weight Limits: Do not exceed the maximum weight capacity of each shelf. Evenly distribute weight across the shelf surface to prevent tipping.

Stability: Always place the heaviest items on the lowest shelf to increase stability.

Leveling: Ensure the unit is assembled on a flat, level surface. Use provided leveling feet or casters as instructed.

Proper Assembly Required: Follow all assembly steps carefully. Do not use the product until all parts are securely fastened.

Do Not Climb: This unit is not designed to support persons or animals. Do not climb, stand, or hang from the shelves.

Children: Contains small parts. Keep children away from the unit during assembly.

Tip-Over Hazard: For taller units, consider anchoring to a wall using provided hardware if used in high-traffic or child-accessible areas.
