360° Rotating Car Tray (Cup Holder Mount) User Manual

Universal Manual for Both Square and Round Models

Square Model

Round Model

1. Product Overview

1.1 Product Description

Designed exclusively for cup holder mounting (passenger seat or rear seat), this 360° rotating car tray transforms your vehicle into a mobile workspace or dining spot. Crafted with premium desktop and reinforced aluminum base, it balances durability, elegance, and functionality—ideal for road trips, daily commutes, or family travels. The adjustable base fits most standard round cup holders, while the smooth 360° swivel ensures flexible positioning without blocking the driver's view.

For enhanced stability, it comes with non-slip pads and anti-slip stickers, which effectively prevent laptops, food containers, or other items from sliding on the desktop, significantly improving the user experience.

1.2 Application Scope

- **Mounting Position:** Compatible with **passenger-side front cup holders** and **rear seat cup holders**
- **Cup Holder Compatibility:** Fits round cup holders with inner diameter 2.75"-3.93" (70mm-100mm). **NOT for square, movable, or detachable cup holders** (measure your cup holder before use).
- **Cup holder depth:** ≤ 3 inches (approximately 7.6cm).
- **Maximum Load Capacity:** 11 lbs (5 kg) – suitable for laptops (13"-15"), food containers, tablets, and drinks.

1.3 Compatibility Limitations

- Vehicles with overly low center console cup holders (resulting in insufficient height after tray installation, which affects usage experience).
- Cup holders not in the center console area (e.g., door-mounted).

Kind Reminder: Please confirm your vehicle's cup holder depth and position before purchasing to ensure the best usage effect.

2. Installation Instructions (Cup Holder Mount - No Tools Needed)

2.1 Pre-Installation Check

1. Confirm cup holder is **round**, located in the **center console (driver's/front passenger's side)**, and meets:
 - Inner diameter: 2.75"-3.93" (70mm-100mm)
 - Depth: ≤ 3 inches (≈7.6cm)
2. Ensure the cup holder is **fixed** (not removable or sliding) – unstable cup holders may cause the tray to wobble.
3. Clear the cup holder of any debris (e.g., crumbs, stickers) to ensure a tight fit.

2.2 Step-by-Step Installation

For Passenger-Side Front Cup Holder

1. **Adjust Base Diameter:** Twist the base clockwise to expand it, or counterclockwise to shrink it—match the diameter to your cup holder (leave a 0.1"-0.2" gap for insertion).
2. **Insert & Lock Base:** Place the adjustable base into the cup holder. Twist the base clockwise until it feels tight. Gently tug the base to confirm it doesn't move.
3. **Install Height-Adjustment Accessories (Optional):** Attach 1 or 2 accessories to the base top (align the accessory's slot with the base's protrusion, push until locked).
4. **Attach Desktop:** Align the 360° rotating connector on the base with the bottom of the desktop. Push the desktop down until it locks into place (no additional tools required).

For Rear Seat Cup Holder

1. Follow Steps 1-3 above to install the base in the rear cup holder.
2. Adjust the rotating connector to angle the desktop toward the rear passenger (avoid blocking legroom or door handles).

3. Operation Guide

3.1 Height Adjustment & 360° Rotation

- **Adjust the height flexibly according to your needs**
- **Height Adjustment** (with 2 removable height-adjustment accessories):
 - Without height-adjustment accessories: Tray height is approximately 2.75"(6cm).
 - With 1 height-adjustment accessory: Total height is approximately 3.93"(10cm).
 - With 2 height-adjustment accessories: Total height is approximately 5.51"(14cm).

3.2 Disassembly & Storage

1. Remove desktop (lift straight up).
2. Detach height accessories (pull upward, if installed).
3. Remove base (twist counterclockwise to shrink, pull out).

4. Safety Warnings

4.1 Critical Safety Rules

- **While Driving:** NEVER adjust the tray, add/remove heavy items, or lean on the tray during vehicle movement. Sudden stops may cause items to slide or the tray to tip.
- **Prohibited Mounting:** Do NOT install in the **driver's side cup holder** – it may interfere with driving operations (e.g., shifting gears, using the emergency brake).
- **Children & Pets:** Keep children under adult supervision when the tray is in use. Do not let pets climb on or chew the tray (and aluminum parts pose choking hazards).

4.2 Usage Limitations

- Do not exceed the maximum load (11 lbs/5 kg) – overloading may bend the base or damage the rotating connector.
- Avoid placing hot items (e.g., boiling water, heated pans) directly on the desktop (use a heat mat to prevent warping).
- Keep the tray away from moisture (e.g., spilled drinks) – wipe surfaces dry immediately to avoid staining or swelling.

5. Cleaning & Maintenance

5.1 Desktop Care

- **Daily Cleaning:** Wipe with a soft, dry microfiber cloth to remove dust. For food stains (e.g., ketchup, coffee), dampen the cloth with mild soap and water, then wipe dry – do NOT use harsh chemicals (e.g., bleach, ammonia) which damage the finish.

5.2 Base & Connector

- Clean the base with a dry cloth
