PARTS:

FRAME:

- A. Base
- B. Leg Poles (x2)
- C. Body with Torso Frame
- D. Left Arm
- E. Right Arm
- F. 7.2V 4A Power Adapter

FIGURE:

- G. Feet (x2)
- H. Left Leg
- I. Right Leg
- J. Hip
- K. Head

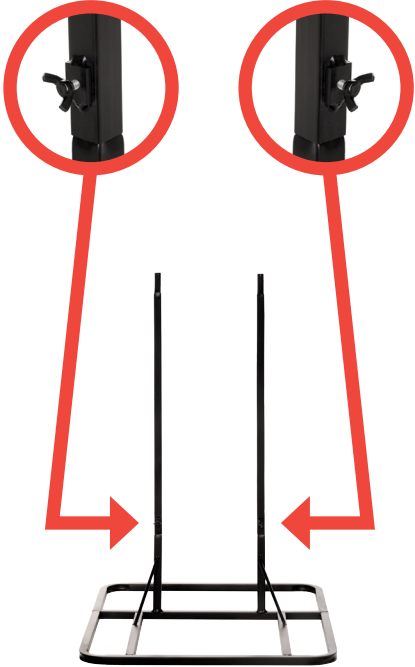

ASSEMBLY

1

Place Base (Part A) on a flat suitable surface. Note: Ensure the “Front” sticker is facing forward.

2

Attach the Leg Poles (Part B) to the Base (Part A). Ensuring the spring pins snap & lock into place & the thumbscrews are tightened.

3

Slide the Feet (Part G) over the Leg Poles (Part B).

4

Thread the Left Leg (Part H) over the left Leg Pole.

5

Repeat previous step for Right Leg (Part I).

6

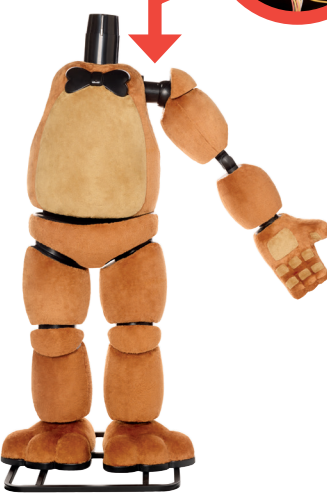

Thread the Hip (Part J) over the Leg Poles (Part B) & rest on Legs. Note: Ensure the “Front” sticker is facing forward.

7

Attach the Body with Torso Frame (Part C) to the Leg Poles (Part B). Remove the access panel cover plate on the back of the torso, then use the access panel to ensure the spring pins snap & lock into place & the thumbscrews are tightened.

8

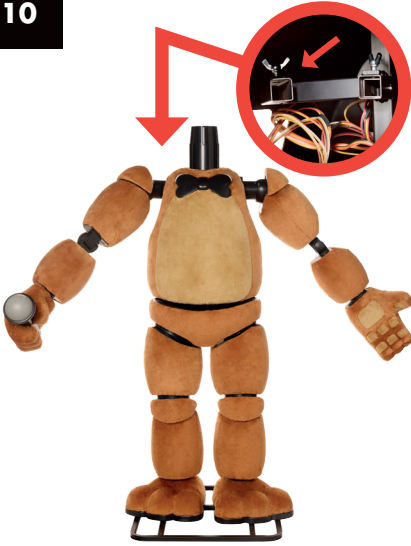

Thread the wires from the Left Arm (Part D) into the left arm hole of the Body with Torso Frame (Part C). Attach the Left Arm (Part D) to the Body with Torso Frame (Part C). Ensure the spring pin snaps & locks into place & the thumbscrew is tightened.

9

Using color and shape, match the 3 wires from the Left Arm (Part D) to the corresponding 3 wires from the Control Box.

10

Repeat steps 8 & 9 for the Right Arm (Part E).

11

Person 1: Hold the Head (Part K) toward the top of the neck on the Body with Torso Frame (Part C).
Person 2: Thread the wires from the Head (Part K) through the opening in the neck. Person 1 - Attach the Head (Part K) to the Body with Torso Frame (Part C). Using color and shape, match the wires from the Head (Part K) to their corresponding wires from the Control Box.

12

Plug one end of the 7.2V 4A Power Adapter (Part F) into the power adapter jack on the control then plug the other end into a suitable outlet. Move in front of the prop to activate it via IR Sensor.

ASSEMBLY

13

VOLUME CONTROL

The volume can be adjusted using the volume control knob on the control box.

14

Place the access panel cover plate back onto the back of the Body with Torso Frame (Part C).

IMPORTANT INFORMATION

1. The infrared sensor distance and ambient temperature are directly related. When the body temperature (98.6° F) is different to the ambient air temperature, the infrared sensor distance will be farther. When the body temperature (98.6° F) is close to the ambient air temperature, the infrared sensor distance will be shorter.
2. Do not use this item in an environment where air currents are caused by a window, air conditioning, or air outlet.
3. Do not have the infrared sensor face a direct source of heat such as a heater.

WARNINGS

Do not turn the prop on until you have completely finished assembling it.
CHOKING HAZARD - Small parts. Not for children under 3 yrs.
This item is for decoration only. This is not a toy.
Keep away from open flame and direct heat sources.
This item is not intended for use by children.
Stay clear of the prop while operating.
